Professional Summary

Computer Science student with hands-on experience in AI-driven applications and full-stack development, focused on building intelligent, scalable, and user-centric systems. Experienced in integrating AI APIs, REST services, and developing context-aware, interactive applications.

Education

B.E. Computer Science and Engineering (Honors – Full Stack) 2023 – 2027 (Expected)
R.M.D Engineering College
CGPA: 7.82 / 10

Master's Program in Software Engineering (MERN Stack) 2024 – 2026 (Expected)
NxtWave CCBP 4.0 Intensive Program (Woolf University)

Higher Secondary Education (Class XII – Matriculation) 2022 – 2023
Revoor Padmanabha Chetty Matriculation Higher Secondary School
Percentage: 88%

Technical Skills

Languages: Java, JavaScript, Python

Database: SQLite, MySQL, PostgreSQL, MongoDB

Development: React.js, TypeScript, Bootstrap, HTML5, CSS3, Node.js, Express.js

APIs & Integrations: REST APIs, SerpAPI, Twilio, ElevenLabs, BotFather, MCP

AI/LLM Frameworks: LangChain, LangGraph, RAG

AI & ML Tools: Roboflow, Hugging Face, Google Colab

AI-Assisted Dev: Claude Code, Ollama, GitHub Copilot

Tools: Git, GitHub, Postman, N8N, Make.com, Docker

Projects

CampusFlow – Full-Stack Campus Workflow Management Platform

- Architected a role-based academic workflow platform using React, TypeScript, Node.js, Express, Prisma, PostgreSQL, Redis, and Tailwind CSS for centralized campus management and approval automation.
- Built secure multi-role modules for OD requests, leave management, student portfolios, announcements, reporting, and AI-powered resume generation with real-time notifications and audit logging.
- Engineered a SerpAPI-based Google Scholar pipeline with multi-source enrichment, concurrency control, retry handling, and conflict-aware academic data merging.

AegisClaim – Multi-Agent AI Prior Authorization Platform

- Architected a scalable health-insurance auto-approval workflow platform using React, TypeScript, FastAPI, MongoDB, PostgreSQL, Redis, Docker, and LangGraph for automated claim processing and decision orchestration.
- Built a PaddleOCR-powered document intelligence pipeline that extracts patient, insurance, ICD/CPT, prescription, and treatment data from unstructured medical documents into structured FHIR-style records.
- Engineered a LangGraph-based multi-agent orchestration system integrating OCR extraction, clarification, policy validation, fraud detection, score aggregation, automated decisioning, and LLM-generated claim explanations.

Positions of Responsibility

- Developed a college ERP system that streamlined academic and administrative workflows.
- Developed and maintained the official college symposium website for two consecutive years.
- Served as an event coordinator for the college symposium, managing **one technical event** with seamless execution.

Certifications

- Oracle Certified Professional: Java SE 17 Developer
- React (Nxtwave)
- Introduction to Databases & SQL (Nxtwave)
- Node.js & Secure API Development (Nxtwave)

Achievements

- Secured **1st Place** in SQL Query Contest at RMK Engineering College.
- Solved **2200+** coding problems on SkillRack.
